BUT 05 600 455 250 R6 080.00 600 Traditional Overflow Requires WAS SP60 ST  Heavy Duty True Tradition Belfast Sink	Butler sinks have been around for centuries and are a lot more robust than imagined. They are easy to clean, resistant to heat, scratches, dirt, household chemicals, stains and odours. They do however need to be handled with an appropriate amount of care and may chip or crack on high impact. They are handcrafted out of fireclay, then glazed in a kiln, and may contain slight imperfections. Sizes may vary slightly due to firing tolerances. We recommend that you get the sink before manufacturing.
